

Codes & Standards

— Safety Relief Valve

Consolidated[®]

The following codes and standards that are applicable to the design, selection and use of pressure relief valves. Some of these are applicable to specific industries, such as those set up by the American Petroleum Institute (API), American Gas Association (AGA), American National Standards Institute (ANSI), American Society of Mechanical Engineers (ASME) and Manufacturers Standardization Society of the Valve and Fittings Industry (MSS). Other codes and standards may apply depending on the country in which pressure relief valves will be installed. When specifying pressure relief valves consideration must be given to local codes that apply to a specific industry and the application in question.

Product intended for installation within the United States and those countries that recognize these standards the following is listing organizations that supply standards that are applicable to pressure relief valves:

American National Standards Institute

11 West 42nd Street, New York, NY 10036

(212) 642-4900

(212) 764-3274
